# Pet Health Plans

At **Frame, Swift and Partners** our aim is to help your pet enjoy a long, healthy and happy life.

Our **Health Plans** focus on preventative healthcare and offer a simple money saving way to ensure your pet gets ALL the regular preventative treatments he or she needs to try and achieve this.

We see all our health plan patients regularly for a full health check. We believe this is key to promptly identifying and addressing any issues that might be developing.

You pay for your pet's **Health Plan** monthly by a simple direct debit payment. This allows you to spread the cost of the care and to save money too.

**Health Plan** members also benefit from discount on a range of other goods and services.

Our Health Plans are different but complimentary to pet insurance. Pet insurance is designed to provide financial cover for unforeseen illness and accidents. We are always happy to discuss the benefits of pet insurance with you and give advice on what to look for in an insurance policy.

## Benefits of our Health Plans

- ✔ All routine vaccinations using the best and most effective modern vaccines.
- ✔ Year round preventative treatments for fleas, worms and other parasites in accordance with your pet's needs are included.
- ✔ As a Health Plan member, your pet will be examined every six months by one of our vets. This gives us the best opportunity to identify, diagnose and manage any health problems that might be developing early and so optimises the chance of successful treatment.
- ✔ Discount on a range of other goods and services (see table).
- ✔ Reassurance that you are providing the best lifetime care for your pet.
