

This June is National Microchipping Month!

Throughout June we will be offering discounted rates for microchipping your pet. When your pet is microchipped your contact details will be logged onto a reunification database, so if your pet goes missing and is picked up by a dog warden, animal shelter or vet, they can be scanned, identified and reunited. The microchip lasts for the life of the pet and cannot be removed like a collar tag, as long as the owners contact details are kept up to date on the database a pet can be reunited even if it is found hundreds of miles away. Please contact the practice to book an appointment if you would like your pet microchipped.
